

# How to Make a Kubb Game

Instructions provided by  
[OutdoorGamePlayers.com](http://OutdoorGamePlayers.com)

## Materials

- 6' of 4"x4" – For the King and Kubbs
- 6' of 1.5"-2" dowel / closet rod – For the Throwing Sticks
- 4' of .75" dowel – For the Corner Pins
- 30' of nylon rope or string – to define the playing area

## Making the king

- Chop off 12" of the 4x4.
- The King often gets decorated to show off how important it is.
- The amount of decoration is up to you.

\* Using a table saw, use two, 45-degree cuts to notch the sides, and make a series of cuts at the top to give the king a crown! A router would be great for this.

## Making the Kubbs

- The size of the kubb is 7cm x 7cm x 15cm or 2.75" x 2.75" x 5.9"
- Trim .5" off of two sides of the 4x4 to make these pieces, using a table saw.
- A 4x4 is actually 3.5"x3.5", so you trim .5", not 1"
- Next, cut 10, 5.9" lengths to create your 10 kubbs.

## Making the Throwing Sticks

- Create 6 batons to throw at the kubbs and the king
- Cut 6, 12" pieces of the 1.5" – 2" dowel. The Throwing Sticks should be about 12" long.
- Then, cut 4, approx. 12" stakes to mark off the playing field.

## Cut your string or rope

- The playing field for kubb is roughly 16.5' by 26'.
- Cut a length of string or rope and tie a few knots where the corner pins will be.
- Wrap the string around a leftover piece of the dowel.
