

Making a Mölkky Game

Instructions Provided by
OutdoorGamePlayers.com

Find Wood

Finding wood to use can be the hardest part. The “official” diameter is 2.5”, but that’s almost impossible to find at a lumber yard. 3” fence post works well. One could also use landscaping wood or cut up tree limbs. Use your imagination!

Buy or Create: 2 1/2” diameter, round wood pieces.

- Diameter and length can vary to suit. Some like fatter, taller skittles and molkkey’s. Some like skittles that vary in size to make it more challenging.)

Cutting the Game Pieces

Mölkky: Cut one piece to 8 3/4”, with two right ends

Skittles: Cut 12 pieces. One end has 45° bevel.

** The long edge should measure 6” in length, the short edge is 3.75”
